Deadline for manuscript submissions:

30 September 2022

Message from the Guest Editors

With forest degradation increasing in the tropics, forest restoration is being employed as an effective and recognized management strategy. Reforestation and afforestation are two distinct methods being used. They are often considered for their biophysical aspects and for their environmental benefits (e.g., carbon sequestration, watershed management, biodiversity).

Technical skills are necessary for implementing both forest restoration and afforestation, but they are not enough for the success of restoration programs. Understanding the social and economic aspects is essential if restoration activities are to be effective.

This Special Issue of Forests aims to identify and better understand the social and economic issues (challenges and benefits) of forest restoration programs in the tropics and their contribution for the success of restoration programs. Submitted manuscripts should not have been published or submitted elsewhere. Through case studies and more global contributions, they should illustrate the importance of considering bottom-up approaches in forest restoration.

Editor-in-Chief

Prof. Dr. Timothy A. Martin

School of Forest Resources and Conservation, PO Box 110410, University of Florida, Gainesville, FL 32611-0410, USA

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and many other databases.

Journal Rank: JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
