

International Journal of Forest Engineering Submit to this Special Issue on: The role of Forest Operations in climate change affected forests

Deadline: 30 November 2018

The International Journal of Forest Engineering (<http://www.tandfonline.com/toc/tife20/current#.U2is9GeW2UQ>) is currently soliciting papers for a Special Issue entitled **"The role of Forest Operations in climate change affected forests"**. Dr. Janine Schweier, of the University of Freiburg (Germany), is serving as Guest Editor for this issue.

Growing attention is being given to forest, agriculture and wood based bio-products in both policy and science, because these products are renewable, biodegradable, capture carbon dioxide from the atmosphere, have a wide range of utilisation and thus, support the main goal to reach a sustainable and a climate neutral economy and society. However, the environment is already affected by significant changes in climate patterns worldwide which leads to the use of more challenging, more complex and thus more expensive biomass and bioenergy supply chains; for example when machines cannot access forest stands due to wet summers or winters and the operations must be carried out motor manually and with cable-yarding systems.

The core question addressed in this Special Issue is how climate change impacts will affect timber harvesting and extraction operations in the future. Prospective authors are invited to contribute original manuscripts covering the following subjects:

- Methods and Tools for climate adapted strategic and operational planning of forest operations
- How does climate change affect tomorrow's Forest Operations?
- Innovative forest harvesting technology and techniques
- Mechanized hardwood logging
- Reduced impact logging
- Sustainable forest wood supply chains
- Carbon costs, carbon storage, carbon sequestration
- Forest Operations on sensitive soils
- Steep terrain harvesting
- Design and maintenance of forest road networks under changing climate conditions

This list is not exclusive, and prospective authors may submit manuscripts from other fields of forest engineering. Submission can be structured to reflect any of the accepted paper types, namely: Research papers, short communications and review papers.

Instructions for Authors

The submission deadline is 30.11.2018. Submitted papers should not be under consideration for publication elsewhere. We encourage authors to send a tentative title and short abstract to the Guest Editor, [Janine Schweier](#) in advance.

For further details about the submission process, please see the [instructions for authors](http://www.tandfonline.com/action/authorSubmission?journalCode=tife20&page=instructions) (<http://www.tandfonline.com/action/authorSubmission?journalCode=tife20&page=instructions>) .

About Taylor & Francis Online

[Taylor & Francis Online \(http://www.tandfonline.com/\)](http://www.tandfonline.com/) provides access to, and information about, all journals from Taylor & Francis and Routledge. [Search or browse \(http://www.tandfonline.com/search/advanced\)](http://www.tandfonline.com/search/advanced) a portfolio of over 2,700 journals from the Taylor & Francis Group.

About Taylor & Francis Group

[Taylor & Francis Group \(http://www.taylorandfrancis.com/\)](http://www.taylorandfrancis.com/) partners with researchers, scholarly societies, universities and libraries worldwide to bring knowledge to life. As one of the world's leading publishers of scholarly journals, books, ebooks and reference works our content spans all areas of humanities, social sciences, behavioural sciences, and science, technology and medicine.

Journal imprints

Taylor & Francis Group journals are published under the [Routledge \(http://routledge.com/\)](http://routledge.com/) and [Taylor & Francis \(http://taylorandfrancisgroup.com/\)](http://taylorandfrancisgroup.com/) imprints.
