背景解读

Background

回顾 2017 年，飓风频发，极端气候频现，二氧化碳排放量四年来首次出现增长，全球环境风险的发生概率已经超出 10 年期平均水平。人类对环境的影响不断加重，生物多样性以大规模灭绝的速度消失，农业系统脆弱，空气和海洋污染已成为对人类健康日益紧迫的威胁。各国能否携手执行《巴黎协定》、推进联合国可持续发展目标成为世界的焦点。

在此背景下，2017 年 1 月，习近平主席于在联合国日内瓦总部万国宫发表演讲，坚定地重申了中国立场，提出要“倡导绿色、低碳、循环、可持续的生产生活方式，平衡推进 2030 年可持续发展目标”；同年 10 月，生态文明在中国十九大报告中首次被提升至“中华民族永续发展的千年大计”。

中国已成为全球生态文明建设的重要参与者、贡献者和引领者。我们需要共同落实可持续发展目标和双边协议，实现减排目标，寻求更好的环境保护和更好的自然保育。我们必须认识到，“绿水青山就是金山银山”，并根据这一认识采取行动。

The year of 2017 saw frequent hurricanes, extreme temperatures and the first rise of CO2 emissions for four years. The occurrence rate of global environmental risk has exceeded the average level in the last decade. Human activities are exerting greater impacts on the environment, resulting in loss of biodiversity at mass-extinction rates, fragile agricultural systems and air and ocean pollution, which pose great threat to human health in turn. Whether countries can join hands to implement the Paris Agreement and meet the SDGs has become a focus of the world.

Under such context, President Xi Jinping delivered a speech at Palace of Nations in January 2017 and reaffirmed China's commitment towards Eco-civilization. President Xi declared that 'We should pursue green, low carbon, recycling and sustainable way of life and production, advance the 2030 agenda'. In October 2017, in the Report of the 19th National Congress of the Communist Party of China (CPC), building an ecological civilization is characterized as 'vital to sustain the Chinese nation's development'.

China has become an important participant, contributor, and torchbearer in the global endeavour for eco-civilization. We shall stand together to implement the Paris Agreement and meet the SDGs, to achieve emission reduction targets and seek for better environment protection as well as better nature conservation. We must realize that lucid waters and lush mountains are invaluable assets and act accordingly.
