

## Swiss Federal Institute for Forest, Snow and Landscape Research WSL

The Swiss Federal Institute for Forest, Snow and Landscape Research WSL is a part of the ETH domain. Approximately 500 people work on the sustainable use and protection of the environment and on the handling of natural hazards.

The Research Unit Forest Dynamics studies the development of trees and forests as impacted by climate and biotic disturbances and seeks a

# Scientific collaborator in Forest Entomology

You investigate ecological and applied insect related questions that are relevant for trees and forests. You will work in a biosafety lab with invasive species as well as in outdoor experiments with important native species. As an active member of national and international networks in your scientific field, you will design projects, seek third-party funding, and publish your results both in peer-reviewed and applied journals.

You must have a PhD in ecological sciences such as biology, environmental sciences, or forestry with training in entomology. You are experienced in acquiring funds, successfully completing research projects, and publishing in scientific journals. You also have profound knowledge in statistical methods. Experience in insect population modeling is a benefit. You communicate fluently in German and/or French as well as in English and you like to work both independently and in a team.

Please send your complete application to Esther Meier, Human Resources WSL. Beat Wermelinger, Head of Entomology, Tel. +41 (0)44 739 22 58, will be happy to answer any questions or offer further information.
