

TRANSLATIONAL PLANT SCIENCES GRADUATE PROGRAM

PROGRAM BENEFITS

The Translational Plant Sciences Graduate Program offers several advantages over traditional graduate programs:

- Flexible curriculum
- 3+ months of practical, hands-on experience at an internship in a variety of possible fields
- Access to career preparation workshops
- Research and practical experience leading to a PhD in a maximum of 5 years
- 5 years of support guaranteed by program including full remission of tuition and fees, a competitive stipend and research related costs

AREAS OF RESEARCH

Applicants interested in the following areas of research are encouraged to apply:

- Global Agriculture
- Plant-based Biotechnology
- International Academia-Industry Interactions
- Energy and Environment
