

Second Announcement and call for abstracts: IUFRO WP 7.02.13 and 7.02.03 Meeting

Novel and classical strategies to manage forest health in plantations

Date: September 17th to 21st, 2023

Place: Campo Grande, Mato Grosso do Sul, Brazil

We have just opened the **abstract submission** for our WP 7.02.13 and 7.02.03 meeting. The conference will discuss the management of forest health issues affecting commercial plantations as eucalypts, pines, and acacia. We are also hosting one satellite event on the September 18th about *Sirex noctilio* management.

Our meeting will take place at the **Centro de Convenções Arq. Rubens Gil de Camillo** (www.centrodeconvencoes.ms.gov.br) in **Campo Grande**, the capital of Mato Grosso do Sul state. Mato Grosso do Sul has the second largest forest plantations area in Brazil and several challenges with pests and diseases and their management, which allows for opportunities for field visits. Campo Grande was chosen as meeting venue due to be the state capital with almost 1 million inhabitants and has good hotel infrastructure for accommodation for all budgets, restaurants, and airport with connection flights to Sao Paulo and Rio de Janeiro.

General schedule

The event will have two days of talks and one day of field visits.

Submission of abstracts

Please see the website for more information. **Abstract submission will close on 15th July 2023.** Due to the short period until our meeting, the abstracts will be evaluated on continuous flow, and you should have your decision 15 days after your submission, so plan ahead.

Registration deadlines and fees

The registration includes:

- badges and meeting materials (folders, pens, etc.);
- participate in the respective workshops, plenary sections, round tables, talk shows, poster presentations, coffee breaks, opening cocktail, lunches and field trip;
- visit the exposition center and stands.
