

IUFRO

The might of vegetative propagation for healthy and productive forests to face climate challenges

2.09.02

Novotel Lakeside,
Rotorua, New Zealand
3-8 March 2024

Join the international IUFRO conference on advancing vegetative propagation technologies of trees.

CONNECT: Join a global network of experts, students, and forest enthusiasts.

COLLABORATE: Work together to tackle sustainable forestry challenges and share your expertise.

LEARN: Discover the benefits of tree propagation, from genetics to resilient forests.

EXPLORE: Embark on field trips to clonal forests and Minginui Nursery, discovering innovative land restoration
