Call for Papers

As an interdisciplinary journal, *Geography and Sustainability* aims to serve as the focal point for developing, coordinating and implementing interdisciplinary research and education related to promote integrated geography for sustainable development. The journal encourages wider analysis and innovative thinking about global or regional sustainability through the bridging and synthesis of physical geography, human geography, ecology, hydrology, atmospheric, climate and social sciences. *Geography and Sustainability* seeks to build and connect multidisciplinary knowledge to increase the impact of research, to explore new development paths, and contribute to achieving sustainable development goals across the global and regional scales. *Geography and Sustainability* publishes Research articles, Review, Technical Comment, and Perspective articles.

With this aim, *Geography and Sustainability* mainly focuses on the following five thematic areas

Geographical processes

Human-Environmental Systems

Ecosystem services and human wellbeing

Sustainable development

Geo-data and model for Sustainability.
