

- ❑ Forest management and planning
- ❑ conservation of forested areas
- ❑ Biodiversity
- ❑ Wildlife
- ❑ Plant Ecosystems
- ❑ Conservation biology
- ❑ Landscape ecology
- ❑ Forested landscape transformations
- ❑ Socio-ecological processes
- ❑ Sustainability
- ❑ Nature base solutions

- ❑ soil sciences
- ❑ deeper understanding of forests hazards and disturbances
- ❑ forest dynamics,
- ❑ forest fires
- ❑ climate change
- ❑ air Pollution threats
- ❑ linkages between the traditional air pollutants and greenhouse gases
- ❑ multiple environmental stressors
- ❑ winds dynamics
- ❑ radioactive contamination of forest ecosystems
- ❑ monitoring nitrogen and sulfur deposition in forest

Pro-active contributing to the UN Decade on Ecosystem Restoration in areas affected by deforestation and degradation in Latin America, Africa and Asia

4 Vibrant Highly interdisciplinary Units
27 RGs
40% Female officeholders

- Core of activities of D8
- ❑ Providing a platform and a network for scientific progress
 - ❑ Actions oriented towards forest education and gender equality in forested landscapes
 - ❑ Capacity building
 - ❑ Participatory workshops
